

GEOGRAPH

The Road to Successfully Managing Your Fiber Optic Network

CrescentLink by GEOGRAPH is a fiber management software system that puts you in control of your network. As an extension of Esri® ArcGIS®, CrescentLink takes data and creates a digital twin to become your single source of truth and makes planning, trouble shooting, and maintaining your network quick and easy.

01

Visualize your map

CrescentLink creates a digital twin of your fiber, copper, or coax network and provides you with a comprehensive, big-picture view.

02

Access all your data in one single source

No more checking multiple files and sources to find the information you need.

04

Reduce outage response time

All your network data is at your finger tips, so you can easily find trouble when it occurs and you can reduce unnecessary truck rolls.

View real-time data

Intuitive splice reporting allows anyone from C-Suite to the field to generate and review splice diagrams.

03

05

Take full control

Easily customize your map to fit your needs – without having to call a customer service agent to make changes.

06

Gain visibility in the field

Access your network from any web-capable device by expanding with our new product: CrescentLink Web Experience.

Why Choose CrescentLink?

CrescentLink by GEOGRAPH gives you the ability to map your entire network, whether you're running fiber, copper, or coax.

It's an extension of Esri® ArcGIS® – the global leader in GIS software, location intelligence, and mapping technology.

The Bottom Line

Let us show you how CrescentLink by GEOGRAPH can improve your fiber network operational efficiency with faster outage management response time and reduced expense. If you're ready to start your journey toward successful network management, **get in touch today!**

Plan smarter. Build faster. Take control.
