GEOGRAPH

IMPROVED FIBER MAPPING FOR ELECTRIC COOPERATIVES

For electric co-ops, troubleshooting network problems is difficult without access to the right data. The need for greater visibility into network connectivity is high – especially in the event of an outage. That's where CrescentLink 6.0 for Desktop and Web Experience comes in. Rely on GEOGRAPH for the tools and expertise to map + manage your fiber networks.

DISCOVER THE BENEFITS OF CrescentLink

ESRI-BASED PLATFORM
CrescentLink by GEOGRAPH is built on Esri's® ArcGIS® Desktop and Enterprise systems – the most popular GIS mapping software in use at most electric cooperatives.

FAST, EASY TO USE, INTUITIVE INTERFACE
CrescentLink by GEOGRAPH makes it easy to make quick changes – even if you are not as comfortable managing fiber as you are managing electric.

VISUAL REPRESENTATION OF YOUR FIBER MAP
Easily create a digital twin of your network to gain a big-picture view of how your system is laid out. CrescentLink allows you to spatially see where the fiber is running as well as where splice points are located and how the fibers are connected – so you can understand the availability left within each cable.

EASY ACCESS TO DATA
Work teams can access and interact with the network from any web-capable device with CrescentLink Web Experience. They can perform field splicing and equipment installation work, and can navigate, view, and interact with inside and outside plant connections.

ALL DATA IN ONE PLACE
All your network data becomes a single source of truth and can live right alongside your electric mapping platform – instead of in spreadsheets, files in network drives, or employees' heads.

TAKE CONTROL OF YOUR DATA
CrescentLink software makes it easy for you to customize and configure your maps and data to suit your needs – all without requiring customer support interaction to configure your additions.

ELECTRIC CO-OPS CAN RELY ON GEOGRAPH

Your customers depend on you to maintain and restore their electric power. That's why our locally based customer service and development teams provide you with the same level of support with our 24/7 ticketing system. See for yourself why we have a 100% customer satisfaction rating. Plan smarter. Build faster. Take control. **Get in touch** with GEOGRAPH today.
